STEM ENRICHMENT PROGRAMS

The **Center for Literacy, Education & Employment (CLEE)** at the University of Tennessee, in partnership with Bright Start Family Literacy and the ALCOA Foundation, developed a unique **family STEM camp** which is research based and was piloted in March 2013. Building on the results of this project, **we are seeking partnerships for broader STEM elementary education initiatives.** Opportunities are available for both classroom and after-school learning; customized to meet the unique needs of individual schools and school systems across TN.

We can provide:

- **Curriculum** – *Quality STEM Activities and lessons aligned with the Common Core*
- **Evaluation** – *Comprehensive evaluation reports including data analysis*
- **Needs Assessment** – *Test score review, surveys, and focus groups*
- **Program Coordination** – *Logistics, planning, and staffing support*

Why CLEE?

CLEE has been in existence for over 25 years. We have a School and Family Support team comprised of experienced program developers and researchers dedicated to serving school-age children and the educators who work with them. Our team offers:

- Expertise on **educational resources**
- Expertise in **family and parent involvement**
- In-depth knowledge of **Common Core State Standards**
- In-depth knowledge of **TN Science Standards**
- Relationships with **STEM content experts** at the University of Tennessee
- Experience in **partnering with the TN Department of Education**
- Working knowledge of **student assessments**
